1. Qualitative Information Regarding Financial Results for the Third Quarter under Review

Explanation of Operating Results

Looking at the economic environment during the first nine months of the fiscal year under review, we saw companies continue to actively harness the power of IT to change their operations, such as promoting digital transformation (DX), implementing business reforms, and developing new digital services, despite global uncertainty, persistent inflation, and the increase of overseas interest rates. Companies are revamping their work styles and overall supply chains following the enforcement of the Work Style Reform Law, and accelerating the use of IT in areas related to ESG and the SDGs. These things boost IT investments in all sectors and fields. In terms of individual lifestyles, the use of IT-driven services, such as shopping at e-commerce sites, enjoying entertainment and sports on video and online, and accessing education and self-development services online, has become common, and various related services are being created.

Working against this backdrop, we won contracts from customers in a wide range of industries and made progress with large-scale projects that would contribute to medium-term growth. As a result, consolidated net sales of the Group for the first nine months of the current fiscal year totaled 44,222 million yen (up 11.6% year on year) and operating income was 10,383 million yen (up 10.9% year on year). On the other hand, profit attributable to owners of parent decreased slightly to 7,119 million yen (down 1.1% year on year), mainly due to the recording of gain on sale of investment securities as extraordinary income in the previous quarter.

Details of the performance (net sales and operating income) of each segment are as follows.

(1) IT Consulting & Service Business

Future Architect, Inc. (including the Technology Division of Future Corporation) continued to move ahead with various projects of customers in a wide range of industries and won contracts with them. They include designs of platforms for integrated data management of procurement, manufacturing, and quality control in the retail industry, renovations of mission-critical systems in the apparel industry, grand designs for advancing DX of a newspaper company group, and designs/development relating to the revamping of mission-critical systems and IT infrastructures in the food wholesaling and public service industries. In addition to that, the company made steady progress with the projects to introduce next-generation banking systems to regional financial institutions. The first one is at the final integration test phase toward release in the next fiscal year and the second one for another bank is at the developmental phase. These projects will contribute to the company's medium-term growth. The Company also provided DX assistance to various companies in the logistics and other industries. Furthermore, as a result of ensuring quality control in implementing projects, its net sales and operating income increased year on year.

Future Inspace, Inc. performed steadily in development for system infrastructure renewal and cloud migration projects from existing customers, in addition to the provision of regular maintenance and operation services. As a result, net sales and operating income increased year on year.

Future One, Inc. worked on boosting orders for the sale of its original InfiniOne software package, the company's key product, through industry-specific sales strategies, mainly in the steel industry. On the other hand, orders received were sluggish due to a slowdown of IT investment by SMEs following the implementation of the invoice system in Japan (a consumption tax system that started in October 2023). As a result, net sales and operating income decreased year on year.

YDC Corporation saw continuous steady progress in developing new customers as well as expanding existing customers while developing their demands, particularly in the manufacturing industry. In addition to these traditional SI, it enjoyed an increase in orders led by the strategic planning phase, such as mission-critical system renovation and grand design consultation for the SmartFactory concept. In addition, net sales and operating profit increased year on year mainly due to an increase in license sales of YDC SONAR®.

Orders for cybersecurity-related services of dit Co., Ltd., such as vulnerability assessment, incident response, and network security solutions, were slower than planned despite an increase in new project acquisition, and in terms of product sales, no orders were received in large-scale projects. While recruiting costs were also incurred continuously, net sales and operating income declined year on year.

As a result, the segment saw both net sales and operating income increase to reach 38,067 million yen (up 12.5% year on year) and 10,631 million yen (up 7.0% year on year) respectively.

(2) Business Innovation Business

YOCABITO Co., Ltd. saw a recovery in gross margin ratio as it cleared its slow-moving inventories to a certain extent, and utilized a digital platform to implement per-product appropriate profit management, product renewal and removal, and strategic sales price setting, etc., but saw net sales and operating income decrease year on year due to continued stagnant sales in its outdoor business in the fiercely competitive

market.

While Tokyo Calendar Inc. saw a robust stream of revenue from magazines and advertising sales get on a recovery track, net sales increased but the operating income fell year on year due to costs relating to the development of its new service Gourmet Calendar.

While CodeCamp Co., Ltd. saw a decrease in sales from individual customers due to the reduction of advertisements, it continued to enjoy an uptick in its corporate training business. In addition, as a result of appropriate cost control, the company saw an increase in net sales and operating income year on year.

LaiBlitz, Inc. steadily worked on new development projects in the construction and restaurant industries, and more additional functional development for a sports team that introduced a packaged membership management service called FastBiz and a data analysis system called Fastball, leading to a year-on-year increase in both net sales and operating income.

As a result, the segment saw an increase in net sales and a decrease in operating income year on year, with net sales totaling 6,061 million yen (up 2.6% year on year) and an operating loss standing at 323 million yen (down from an operating loss of 307 million yen for the same period last year).

Operating income under adjustments which post income and expenses of Future Corporation's holding company functions and eliminations of intersegment transactions in the reporting segment, was 199 million yen, an increase of 440 million yen year on year (up from an operating loss of 240 million yen for the same period last year). This was mainly due to the increased technical support fees that Future Corporation received through its IT consulting and services business.

(Note) Segment results mentioned above are before adjustment for intersegmental sales or transfers.

(Notes on premise of a going concern)

Not applicable.

(Notes on any significant change in shareholders' equity)

Not applicable.

(Changes in accounting policies)

(Application of Accounting Standard for Fair Value Measurement, etc.)

The Group has applied the "Implementation Guidance on Accounting Standard for Fair Value Measurement" (ASBJ Guidance No. 31, June 17, 2021) from the beginning of the first quarter of the current fiscal year, and it has applied the new accounting policy provided for by the Implementation Guidance on Accounting Standard for Fair Value Measurement prospectively in accordance with the transitional measures provided for in paragraph 27-2 of the Implementation Guidance on Accounting Standard for Fair Value Measurement. This change has no effect on the quarterly consolidated financial statements.

(Business Combinations)

Provisional accounting pertaining to business combination

The Company applied provisional accounting for the business combination with CURIOSITY inc. implemented on April 21, 2023, for the second quarter of the fiscal year ending December 31, 2023, and finalized the accounting for the third quarter under review.

Due to the finalization of this provisional accounting, the amount of goodwill calculated tentatively of 1,553 million yen decreased by 707 million yen to 846 million yen. The decrease of goodwill is mainly due to an increase in customer-related assets of 105 million yen, technology-related assets of 914 million yen, and deferred tax liabilities of 312 million yen.

Amortization period is 8 years for goodwill, 2 years for customer-related assets, and 10 years for technology-related assets.
