

Future Architect Develops Core System for E-Commerce Launch of cloud services to support optimal EC operations

Future Architect, Inc.
TOKYO, Japan, June 15, 2022 / Future Architect, Inc.

Future Architect, Inc. (Headquarters: Shinagawa-ku, Tokyo; President: SHINGU Yuki), a main operating company of Future Corporation, has developed a cloud-based core system for e-commerce as a solution for SMEs. This system was introduced by YOCABITO Co., Ltd. (Headquarters: Gifu City, Gifu; President: IIJIMA Aya), a Future Group company, acting as its first user for the purpose of improving operational efficiency and increasing sales. In June 2022, Future Architect will start providing this solution together with the Future Group company, Future One, Inc. (Head Office: Shinagawa-ku, Tokyo; President: SATO Takaharu).

The core e-commerce system was developed by Future Architect, which has experience building core systems for various distribution companies. In addition to front-end operations such as data linkage to multiple EC sites and the automatic creation of product pages, this service covers a range of operations necessary for EC businesses, including back-end operations such as procurement/ordering, shipment/receipt management, settlement/order/payment management, and financial/administrative accounting.

About: Future Corporation

Future Group is a company that conducts "IT Consulting & Service Business" and "Innovation Business" through the use of latest technology. Since the founding in 1989, we have designed and improved the business of our clients through developing systems that integrates business management with IT. Our clients are from various industries including Finance, Manufacturing, Distribution and Logistics. We have also created our own new services based on the know-how we have accumulated in this process. We are contributing to the society by promoting innovation and creating new values for clients that is based on the strengths of "connoisseurship" and "implementation ability" of latest technologies such as AI and robotics.
