Launch of CyberArk Endpoint Privilege Manager

dit Co., Ltd.
TOKYO, Japan, July 5, 2022 / dit Co., Ltd.

 Aiming to become the No. 1 security solutions company, dit Co., Ltd. (Headquarters: Shinagawa-ku, Tokyo; President: TODA Masaru; hereinafter, "dit") is pleased to announce the launch of CyberArk Endpoint Privilege Manager, a part of CyberArk Identity Security Platform of CyberArk Software (Headquarters: Newton, Massachusetts (USA), Petach-Tikva (Israel)), a leading provider of privileged access management products, from July 6.

 CyberArk Endpoint Privilege Manager, a SaaS solution, defends against enterprise attacks by removing local administrator privileges, applying minimal privileges, and preventing tampering across the endpoint security stack. At the same time, it can drive operational efficiencies, streamline IT workflows, and reduce the workload of IT service desks. It has a unified interface to protect endpoints for Windows, Linux, and Mac platforms, making it extremely effective against intrusions and ransomware attacks.

 dit provides support for customers' security challenges, including products, services, and development.

About：Future Corporation
Future Group is a company that conducts "IT Consulting & Service Business" and "Innovation Business" through the use of latest technology. Since the founding in 1989, we have designed and improved the business of our clients through developing systems that integrates business management with IT.
