

Future Architect Launches Logistics DX Consulting Service Leveraging AI, IoT, and robotics to design all aspects of logistics, from strategy to implementation

Future Architect, Inc.
TOKYO, Japan, August 1, 2022 / Future Architect, Inc.

In August 2022, Future Architect, Inc. (Headquarters: Shinagawa-ku, Tokyo; President: SHINGU Yuki), a main operating company of Future Corporation (Securities Code: 4722), will launch a logistics DX consulting service to help customers in all industries solve their problems.

This service systematizes solutions in three areas; Strategy, Business Design, and System Design, which are necessary to promote DX in the logistics business. In addition to strategy development and system implementation, we will support customers with consolidating locations, designing warehouse facilities, restructuring supply chain networks, and more. We will also introduce the latest technologies, such as AI, IoT, and robotics, to facilitate business automation, visualization, and optimization through simulations.

About: Future Corporation

Future Group is a company that conducts "IT Consulting & Service Business" and "Innovation Business" through the use of latest technology. Since the founding in 1989, we have designed and improved the business of our clients through developing systems that integrates business management with IT. Our clients are from various industries including Finance, Manufacturing, Distribution and Logistics. We have also created our own new services based on the know-how we have accumulated in this process. We are contributing to the society by promoting innovation and creating new values for clients that is based on the strengths of "connoisseurship" and "implementation ability" of latest technologies such as AI and robotics.
