

Code Camp Expands Solutions for Reskilling DX Personnel with Training Linked to Practical Work **Providing a wide range of training from IT literacy education to develop DX promotion leaders and management personnel**

CodeCamp Co., Ltd.
TOKYO, Japan, February 2, 2023 / CodeCamp Co., Ltd.

CodeCamp Co., Ltd. (Location: Shinagawa-ku, Tokyo; President: KAWANISHI Rika; hereinafter, “CodeCamp”) is expanding its DX personnel development and reskilling solutions (*1) for companies working to promote digital transformation (DX). In addition to providing assessments to visualize the level of DX promotion, we have begun offering curricula for personnel development essential to DX promotion, including a project manager training course and system operation manager training course.

CodeCamp supports DX personnel development and reskilling as a means of realizing management strategies. CodeCamp’s DX personnel development solution defines the required personnel and plans and then implements training programs by working backward from the company’s vision for the future. We offer a wide ranging training menu with options ranging from IT literacy education for all employees, to education for leaders who are central to promoting DX in the field, to education for developing core personnel (management personnel) who promote DX.
