

Launch of Consulting Service Utilizing LLMs Supporting Digital Transformation promotion using large-scale language models

Future Corporation
TOKYO, Japan, August 21, 2023 / Future Corporation

In August 2023, Future Corporation (Headquarters: Shinagawa-ku, Tokyo; Chairman and President, Group CEO: KANEMARU Yasufumi) will begin offering the Consulting Service Utilizing LLMs (Large Language Models), a full-scale consulting service that accelerates Digital Transformation by utilizing LLMs in corporate operations.

As a social design company that designs customer's futures based on technology, Future has supported Digital Transformation promotion in various industries. Of those, Strategic AI Group, which has consultants specializing in AI technology, provides AI consulting services* for natural language processing, machine learning, and other customer issues ranging from machine learning operations (MLOps) to implementation. In order to meet the needs of business efficiency and new value creation, this consulting service utilizing LLMs offers three service menus: "Introducing an interactive AI system internally," "Utilizing the company's own data," and "Utilizing LLMs for business processes." Our highly specialized AI consultants provide advanced tuning of natural language processing for even the most difficult use cases. We provide comprehensive support through interviews, from understanding issues to considering the optimal approach for implementation with an eye to business effectiveness, technological verification, system development, and implementation.
