

Digital Transformation Support for JAPEX's "Feasibility Study on Energy Service Using LNG for Northern Vietnam Industrial Park"

Considering the use of digital technology such as remote monitoring of facilities and technical education for local employees

Future Architect, Inc.
TOKYO, Japan, September 27, 2023 / Future Architect, Inc.

From September 2023, Future Architect, Inc. (Headquarters: Shinagawa-ku, Tokyo; President: SHINGU Yuki), a main operating company of Future Corporation (Securities Code: 4722), will provide Digital Transformation support to Japan Petroleum Exploration Co., Ltd. (Head Office: Chiyoda-ku, Tokyo; Representative Director and President, CEO: FUJITA Masahiro; hereinafter "JAPEX") in their "Feasibility study on Energy Service using LNG (Liquefied Natural Gas) to users in the industrial park located in the northern part of the Socialist Republic of Vietnam."

Since November 2022, Future Architect has been engaged in the "Digital Transformation Promotion Support Project" for the medium- to long-term growth of JAPEX, and even now is continuing to support the implementation of measures.

This project is based on the construction plan for an LNG receiving terminal in Hai Phong City in northern Vietnam. Based on this plan, JAPEX will examine ways for customers in the industrial park located in the city who are using LPG and heavy oil to switch to LNG as a fuel source, as well as energy services aimed at optimizing energy use. It was also adopted for the Ministry of Economy, Trade and Industry's FY2023 "Subsidy for Feasibility Study Project for Overseas Deployment of High Quality Energy Infrastructure," and we plan to examine feasibility in this area based on the specifications, scale, and estimated investment amount required for the facilities necessary to realize the energy services. In this study, we will support examinations on the use of digital technology such as remote monitoring of facilities and technology education for local employees by using 3D images.

About: Future Corporation

Future Group is a company that conducts "IT Consulting & Service Business" and "Innovation Business" through the use of latest technology. Since the founding in 1989, we have designed and improved the business of our clients through developing systems that integrates business management with IT. Our clients are from various industries including Finance, Manufacturing, Distribution and Logistics. We have also created our own new services based on the know-how we have accumulated in this process. We are contributing to the society by promoting innovation and creating new values for clients that is based on the strengths of "connoisseurship" and "implementation ability" of latest technologies such as AI and robotics.
