

Future and Waseda University Establish Sustainable Future Leadership Consortium Co-creating sustainability management models and environmental evaluation standards with six participating companies

Future Corporation
TOKYO, Japan, November 10, 2023 / Future Corporation

On November 9, 2023, Future Corporation (Headquarters: Shinagawa-ku, Tokyo; Chairman and President, Group CEO: KANEMARU Yasufumi) and Waseda University (Head Office: Shinjuku-ku, Tokyo; President: TANAKA Aiji) established the Sustainable Future Leadership Consortium in order to realize a sustainable society. The Consortium aims to create a framework for creating new markets and building environmental evaluation standards based on Japan's strengths by engaging industry and academia in collaborative discussions on how to manage sustainability. In addition to Future and Waseda University, six companies from various industries will participate in the Consortium to promote activities across industries.

The Consortium, led by the Future Group and Waseda University, will work together with participating companies to examine the ideal form of sustainability management required in moving forward in the ESG field. For the environmental field in particular, we will build a framework based on the knowledge and know-how cultivated over the years by Japanese companies with strengths in environmental and energy-saving technologies to ensure that corporate business activities are properly evaluated. We are also aiming to develop an ESG management platform that allows information on greenhouse gas emissions, human capital, and corporate governance to be visualized throughout the supply chain, including partner companies and related companies, and to expand it across all industries.

About:Future Corporation

Future Group is a company that conducts "IT Consulting & Service Business" and "Innovation Business" through the use of latest technology. Since the founding in 1989, we have designed and improved the business of our clients through developing systems that integrates business management with IT. Our clients are from various industries including Finance, Manufacturing, Distribution and Logistics. We have also created our own new services based on the know-how we have accumulated in this process. We are contributing to the society by promoting innovation and creating new values for clients that is based on the strengths of "connoisseurship" and "implementation ability" of latest technologies such as AI and robotics.
