

Future Wins Award at "7th Career Design Program Awards Chosen By Students" "Engineer Camp" internship selected out of 1,115 programs at 1,013 companies across Japan

Future Corporation
TOKYO, Japan, April 22, 2024 / Future Corporation

Future Corporation (Shingawa-ku, Tokyo; Chairman and President, Group CEO: KANEMARU Yasufumi) was selected as the recipient of an award from among 1,115 programs at 1,013 companies across Japan in the "7th Career Design Program Awards Chosen By Students." The award-receiving project is the "Engineer Camp" internship program, which Future conducted from August 21 to September 15, 2023, jointly with Future Architect, Inc. (Headquarters: Shinagawa-ku, Tokyo; President: TANIGUCHI Tomohiko), a main operating company.

This award, which started in 2018, aims to improve the quality of programs that foster views on occupations among students and promote the increase of companies implementing such programs, by awarding internships and career development support initiatives that contribute to students' social and professional independence.

The "Engineer Camp" is a Future's unique program that is designed to enable students to find work as IT consultants while developing their technical skills through internships. It is designed around three pillars: "realistic work experience," "communication design with career design in mind," and "business skills acquisition."

Under the concept of "gradation career path," Future is promoting the creation of an environment in which each person can freely consider their career and develop their career by taking on new challenges.

About: Future Corporation

Future Group is a company that conducts "IT Consulting & Service Business" and "Innovation Business" through the use of latest technology. Since the founding in 1989, we have designed and improved the business of our clients through developing systems that integrates business management with IT. Our clients are from various industries including Finance, Manufacturing, Distribution and Logistics. We have also created our own new services based on the know-how we have accumulated in this process. We are contributing to the society by promoting innovation and creating new values for clients that is based on the strengths of "connoisseurship" and "implementation ability" of latest technologies such as AI and robotics.
