# Future Architect Introduces Generative AI to Support Reform of Legacy Systems

## Strengthening DX consulting that looks beyond the "2025 cliff" by leveraging the strength of "Futurefraqta" current source code analysis functions

Future Architect, Inc.
TOKYO, Japan, June 25, 2024 / Future Architect, Inc.

Future Architect, Inc. (Headquarters: Shinagawa-ku, Tokyo; President: TANIGUCHI Tomohiko), a main operating company of Future Corporation (Securities Code: 4722), will introduce generative AI into the current code analysis functions of "Futurefraqta,"* a proprietary solution that supports scientific project management, to enable more efficient system reform and provide more flexible DX consulting services utilizing its existing knowledge from June 2024.

"Futurefraqta" is a scientific and systematic solution based on the Future Architect's expertise from numerous large-scale reform projects that it has worked on, including legacy systems. It has already been utilized in projects at more than 80 companies, mainly large-scale projects with systems on scales that exceed tens of millions of steps. It uses a fact-based approach based on data to support safe and steady system migration and efficient project management.

Factors such as the trend toward higher maintenance and operation expenses as systems age and the suspension of mainframe manufacturing and sales have made DX a pressing management issue for many companies. Based on this, in addition to providing fully integrated consulting services covering all processes from grand design to implementation and maintenance operations, leveraging the strength in current analysis, Future Architect also provides flexible DX consulting services, including "PMO support for ongoing core system reform projects," "assessment formulation to neutrally evaluate and analyze DX promotion issues as a second opinion," and "training DX personnel capable of promoting operational reforms even after system migration," for which there is high demand from customers.

\*     Patented. "Futurefraqta" is a registered trademark of Future Corporation.

About：Future Corporation
Future Group is a company that conducts "IT Consulting & Service Business" and "Innovation Business" through the use of latest technology. Since the founding in 1989, we have designed and improved the business of our clients through developing systems that integrates business management with IT. Our clients are from various industries including Finance, Manufacturing, Distribution and Logistics. We have also created our own new services based on the know-how we have accumulated in this process. We are contributing to the society by promoting innovation and creating new values for clients that is based on the strengths of "connoisseurship" and "implementation ability" of latest technologies such as AI and robotics.
