

## **Future Architect Provides Full-scale Support for Chief Logistics Officers (CLOs) Promote supply chain visualization and optimization with technology to support “Creating Shared Value” in logistics**

Future Architect, Inc.  
TOKYO, Japan, July 25, 2024 / Future Architect, Inc.

Future Architect, Inc. (Headquarters: Shinagawa-ku, Tokyo; President: TANIGUCHI Tomohiko; hereinafter “Future Architect”), a main operating company of Future Corporation (Securities Code: 4722), will launch full-scale consulting services in July 2024, to support Chief Logistics Officers (CLOs) in the entire process from strategy formulation to promotion and execution, in accordance with Act on Partial Revision of the Act on Advancement of Integration and Streamlining of Distribution Business and the Motor Truck Transportation Business Act, which requires shippers that are designated business operators over a certain size to appoint a CLO.

This service supports the “Creating Shared Value strategy,” which aims to generate economic value in a way that also addresses social issues, and accompanies our clients in the realization and implementation of logistics strategies through the strategic use of the latest technologies. One of the missions of CLOs is to optimize logistics, which requires the visualization of data such as cargo volume and loading capacity along the supply chain, and the strategic use of the latest technologies, including digital technology, is essential to achieve this goal. With abundant technology and logistics expertise, our professionals work in unison to provide comprehensive support for our clients, from strategic planning to concept realization and implementation.

### About: Future Corporation

Future Group is a company that conducts "IT Consulting & Service Business" and "Innovation Business" through the use of latest technology. Since the founding in 1989, we have designed and improved the business of our clients through developing systems that integrates business management with IT. Our clients are from various industries including Finance, Manufacturing, Distribution and Logistics. We have also created our own new services based on the know-how we have accumulated in this process. We are contributing to the society by promoting innovation and creating new values for clients that is based on the strengths of "connoisseurship" and "implementation ability" of latest technologies such as AI and robotics.
