# MIREVO®, the First Software for Dementia Diagnosis and Treatment in Japan, Developed by Future Together With Ai-Brainscience Inc., Now Available

**Supporting the early detection of dementia by realizing a new testing method using eye-tracking technology**

Future Corporation
TOKYO, Japan, January 14, 2025 / Future Corporation

MIREVO®, developed by Future Corporation (Headquarters: Shinagawa-ku, Tokyo; Chairman and President, Group CEO: KANEMARU Yasufumi; hereinafter, "Future") in collaboration with Ai-BrainScience Inc. (Head Office: Suita, Osaka; Chief Executive Officer: TAKAMURA Kentaro; hereinafter, "Ai-BrainScience"), is the first neuropsychological testing program for dementia diagnosis support (testing device software for dementia diagnosis support) and was released on January 14, 2025.

In April 2020, Future signed an investment and collaboration agreement with Ai-BrainScience, an Osaka University-based venture company that is commercializing new technology for the early diagnosis of dementia, and started joint development of MIREVO®, a neuropsychological testing program that uses eye tracking to track peoples' gazes. In October 2023, MIREVO® was approved as Japan's first neuropsychological testing program for supporting the treatment of dementia. Approval was obtained for the manufacture and sale of the medical equipment (approval number: 30500BZX00235000), with Ai-BrainScience Inc. as the manufacturer and distributor and Future Corporation as the manufacturer, and it was launched by Otsuka Pharmaceutical Co., Ltd., on January 14, 2025.

With the desire to detect dementia as early as possible, testing methods using new technologies are being developed. MIREVO® is a neuropsychological testing program that uses eye-tracking technology. The test can be easily conducted and objective test results can be obtained in approximately three minutes using the MIREVO® app installed on a tablet.

* Future has obtained registration as a medical device manufacturer and the second-class marketing license for medical devices. Medical device manufacturer: 13BZ201433, Second-class medical device marketing authorization holder: 13B2X10480, ISO/IEC 27001:2013, ISO 13485:2016

About：Future Corporation
Future Group is a company that conducts "IT Consulting & Service Business" and "Innovation Business" through the use of latest technology. Since the founding in 1989, we have designed and improved the business of our clients through developing systems that integrates business management with IT. Our clients are from various industries including Finance, Manufacturing, Distribution and Logistics. We have also created our own new services based on the know-how we have accumulated in this process. We are contributing to the society by promoting innovation and creating new values for clients that is based on the strengths of "connoisseurship" and "implementation ability" of latest technologies such as AI and robotics.
