

Future Architect “GlyphFeeds Sharing Service” Goes Live at Shinano Mainichi Shimbun

Promoting work style reform for journalists and improving content quality through a unique AI model specialized for editing

Future Architect, Inc.

TOKYO, Japan, December 23, 2025 / Future Architect, Inc.

On December 14, 2025, The Shinano Mainichi Shimbun (Headquarters: Nagano City, Nagano Prefecture; President: KOSAKA Sotaro; hereinafter, “Shinano Mainichi Shimbun”) started operation of the “GlyphFeeds Sharing Service,” a content management system for the media industry by Future Architect, Inc. (Headquarters: Shinagawa-ku, Tokyo; President: TANIGUCHI Tomohiko; hereinafter, “Future Architect”), a main operating company of Future Corporation (Securities Code: 4722).

GlyphFeeds Sharing Service is a cloud-based integrated editing system jointly developed with the Yomiuri Shimbun Tokyo Headquarters (Headquarters: Chiyoda-ku, Tokyo; President: MURAOKA Akitoshi) and based on “GlyphFeeds,” * a CMS for the media industry developed by Future Architect in 2019. This marks the first deployment of the GlyphFeeds Sharing Service outside the Yomiuri Shimbun Group.

In addition, Shinano Mainichi Shimbun and Future Architect have been engaged in research and development for a proprietary AI model with the aim of saving labor and improving the quality of editorial work. By implementing a generative AI model specialized for editing media industry content, we realized automatic generation of search tags for headlines and content based on the text of articles. Implementation of this function is expected to significantly reduce work time.

* GlyphFeeds is a registered trademark of Future Corporation.

About: Future Corporation

Future Group is a company that conducts "IT Consulting & Service Business" and "Innovation Business" through the use of latest technology. Since the founding in 1989, we have designed and improved the business of our clients through developing systems that integrates business management with IT.
